

About the Diesel Technology Forum

The Diesel Technology Forum is a non-profit organization dedicated to raising awareness about the importance of diesel engines, fuel and technology. Diesel Technology Forum members are global leaders in advanced diesel technology and represent the three key elements of the modern diesel system: advanced engines, vehicles and equipment, cleaner diesel fuel and emissions-control systems.

Since it was founded in 2000, the Forum has emerged as a leading source of information on agriculture, economics, energy, environmental, transportation and trade issues impacting diesel technology. The Forum's program is based out of metropolitan Washington, DC with full time representation in California. International in scope, the Forum's resources include technical researchers, policy specialists and communications experts who regularly participate in legislative and regulatory deliberations, technology demonstrations, and industry and media events.

The Forum brings together a broad range of diesel stakeholders including diesel users, public and environmental interest groups, and government officials to encourage the exchange of information and ideas about the use of diesel technology. Elected officials, regulators, members of the media and other opinion leaders count on the Forum for data, insight and expert commentary.

The Forum's website – www.dieselforum.org – serves as a one-stop gateway for information and sources on clean diesel.

Meet Our Members

Members of the Diesel Technology Forum are global leaders of the diesel industry including engine and equipment makers, vehicle manufacturers, key component manufacturers, fuel producers and emissions control technology manufacturers.

AGCO Corporation
BOSCH
Caterpillar Inc.
CNH Industrial
Cummins Inc.
Daimler AG
Deere & Company

Delphi Technologies
